

SETnSIZE is a phenology-targeted nutrient formulation enriched with trace minerals and organic acids. It supports tree crops from fruit set and sizing through to harvest and post-harvest recovery. Its balanced NPK, kelp extracts and amino acids enhance nutrient uptake, stress tolerance and fruit or nut development. Chelated micronutrients and natural biostimulants boost metabolism, tree health, fruit retention and quality.

UNIQUE FEATURES:

- Chelated micronutrients for optimum plant uptake
- Dual action, ethylene-suppressing compounds that improve fruit retention
- Nutrient, plant stimulant and organic acid matrix designed specifically for sizing, stress reduction and post-harvest recovery
- Phenologically specific and designed to improve nutrient assimilation and support plant resource intensive stages e.g. fruit or nut fill

DRUM SIZE 20L • 200L • 1000L

SETnSIZE

SET. SIZE. RECOVER. SETnSIZE FOR COMPLETE CROP PERFORMANCE

APPLICATION TIMING	Litres/Ha
Post Set Stress Reduction	2-4L
Sizing and Filling	2-4L
Pre/Post Harvest Recovery	2-4L

Application Method: Fertigation or foliar spray.

Application Notes:

Do not apply with Copper Fungicide. Dilute with 70-100+L water/HA. If using high volumes of water for foliar sprays use 500-1000mls/ 100L water.

Ingredients:

N 1.08%, P 6.05%, K 7.92%, Mg 1.04%,
Fe 0.15%, S 0.54%, Zn 1.07%, Co 0.18%,
Mn 0.75%, Cu 0.11% plus organic acids, vitamins,
plant stimulants, complex carbohydrates.

Compatibility: Compatible with tech grade fertilisers & a range of pesticides. Always conduct a 'jar test' prior to tank mixing. Caution needs to be taken when mixing with pesticides as potential crop damage could occur. Thoroughly decontaminate tanks and spray equipment before use particularly before applying to sensitive crops. Clean the entire sprayer system, not just the tank.

Storage: Avoid exposure to direct sunlight and store in a cool dry place. Ideally use within six months.
