

RHIZOKELP delivers natural plant hormones and organic compounds that stimulate the rhizosphere and drive root development. Its high auxin content supports root initiation, branching and architecture, whilst boosting stress resilience. Greater root vigour improves nutrient and water uptake, and overall plant establishment.

UNIQUE FEATURES:

- Auxin-rich root development kelp formulation
- Rapid rhizosphere response that promotes root cell division and elongation
- Supports root initiation, branching and architecture for greater root mass
- Contains beneficial biology for improved nutrient uptake and mineralisation
- Amino acids & antioxidants support stress resilience and establishment vigour

DRUM SIZE 20L • 200L • 1000L

RHIZOKELP

AUXIN DRIVEN ROOT DEVELOPMENT

APPLICATION TIMING	LITRES/HA
SOIL APPLIED At planting With fertigation or irrigation application	10-20L 10-20L
FOLIAR APPLIED Key periods of temperature stress With nutrient foliar applications	5-10L 5-10L

Application Notes: Via fertigation, boom, liquid inject or foliar application. Dilute with 70-100+L water/HA

Ingredients: Four species kelp extract concentrate, combining the beneficial properties of northern and southern hemisphere kelp species, biology, organic acids & carbohydrates.

Compatibility: Compatible with tech grade fertilisers. Always conduct a 'jar test' prior to tank mixing. Caution needs to be taken when mixing with pesticides as potential crop damage could occur. Thoroughly decontaminate tanks and spray equipment before use particularly before applying to sensitive crops. Clean the entire sprayer system, not just the tank.

Storage: Avoid exposure to direct sunlight and store in a cool dry place. Ideally use within six months.

For further information refer to the SDS on our website. Switch Ag's responsibility for the product sold is subject to the terms and conditions of sale, a copy which is available upon request.

NOTE: PRODUCT REQUIRES AGITATION PRIOR TO APPLICATION
