PROACTIV is a highly active biological formulation designed to support soil health, nutrient availability, root development and plant performance.

PROACTIV

ACTIVATE THE SOIL + UNLOCK PLANT POTENTIAL

UNIQUE FEATURES:

- Activates the soil–plant relationship
- Unlocks the biological potential of the soil
- Auxin-rich kelp added to stimulate germination and root development
- Enhances nutrient availability and uptake
- Reduces fungal disease pressure
- Amino acids support stress mitigation and plant health
- Compatible with tech grade fertilisers and most pesticides

OAC
Organic Acid Chelation

MADE IN AUSTRALIA

Manufactured by:

DRUM SIZE 20L • 200L • 1000L

APPLICATION TIMING	LITRES/HA
SOIL APPLIED	
At planting	10-20L
With fertigation or irrigation application	10-20L
FOLIAR APPLIED	
Key periods of temperature stress	5-10L
With nutrient foliar applications	5-10L

Application Notes: Via fertigation, boom, liquid inject or foliar application. Dilute with 70-100+L water/HA.

Ingredients: Activated biology, organic acids, trace minerals, complex carbohydrates, VAM fungi, wetter.

For Best Results: Apply throughout the growing season with or without the addition of tech grade fertiliser. Apply in overcast conditions where possible.

Compatibility: Compatible with a range of pesticides. Always conduct a 'jar test' when mixing with chemicals prior to application. Caution needs to be taken when mixing with herbicides as potential crop damage could occur. Thoroughly decontaminate tanks and spray equipment before use particularly before applying to sensitive crops. Clean the entire sprayer system, not just the tank.

Storage: Avoid exposure to direct sunlight and store in a cool dry place for a 2 year shelf life.

For further information refer to the SDS on our website. Switch Ag's responsibility for the product sold is subject to the terms and conditions of sale, a copy which is available upon request.
