

ADVANCED FORMULATION:

- Beneficial Biology
- Kelp, Humates, Molasses
- Fulvic & Amino Acid package
- VAM Fungi Technology

UNIQUE FEATURES:

- Greater uptake of soil applied fertiliser
- Improved disease tolerance from soil borne fungal pathogens
- Increased water use efficiency and drought tolerance (VAM Fungi)
- Highly concentrated and easy to apply
- Compatible with tech grade fertilisers and most pesticides
- Supported by Independent Trial Data

Manufactured by:
Switch Ag Pty Ltd
Cowra NSW 2794

DRUM SIZE 20L • 200L • 1000L

PROMOTE

INCREASE FERTILISER UPTAKE + REDUCE FUNGAL DISEASE

CROP	LITRES/HA
Horticulture	30-60 per annum
Broadacre	5-10 at planting
Pasture	20-40 per annum

Apply via fertigation, boom or liquid inject.
Dilute with 70-100+L water/HA

Ingredients:

Beneficial Biology, Trace Minerals,
Amino Acid, Humates, Kelp, Molasses,
Mycorrhizal Fungi (VAM)

For Best Results: Apply throughout the growing season with or without the addition of tech grade fertiliser. Apply in overcast conditions where possible.

Compatibility: Compatible with a range of pesticides. Always conduct a 'jar test' when mixing with chemicals prior to application. Caution needs to be taken when mixing with herbicides as potential crop damage could occur. Thoroughly decontaminate tanks and spray equipment before use particularly before applying to sensitive crops. Clean the entire sprayer system, not just the tank.

Storage: Avoid exposure to direct sunlight and store in a cool dry place for a 2 year shelf life.

For further information refer to the SDS on our website. Switch Ag's responsibility for the product sold is subject to the terms and conditions of sale, a copy which is available upon request.
