**MICROSOIL**  
liquid fertiliser

**10 YEARS OF TRIALS SHOWING IMPROVED  
GERMINATION, FLOWERING, DISEASE RESISTANCE,  
QUALITY & YIELD.**

**SOIL & PLANT STIMULANTS TESTED & PROVEN ON AUSTRALIAN FARMS FOR 15 YEARS**

 **OAC**  
Organic Acid Chelation

**WWW.SWITCHAG.AU**

**Switch Ag Products** have been scientifically proven in replicated trials to enhance plant performance and deliver higher yields.

Our products can be applied with fertiliser & pesticides by either fertigation or foliar application.

Product Certified for  
**ORGANIC FARMING**

A unique liquid combination of 14 strains of beneficial microbes, plant stimulants and carbohydrates has been independently proven in years of field trials to improve fertiliser availability & plant uptake, reduce fungal disease and increase yield.

Advance Amino is a full spectrum L-Amino acid that is derived from plants making it highly available to all agricultural crops. Its unique combination includes a range of beneficial biology, trace minerals, carbohydrates and enzymes.

The only form of Silicon that is available to plant roots is Monosilicic Acid (H4SiO4). Plant Guard has the highest tested level of Monosilicic Acid available for both root & foliar uptake by plants – 24% MSA. Creating strong, healthy, resilient plants.

ZIMBA combines a range of essential trace minerals complexed with organic acids, plant stimulants and beneficial biology to maximise plant uptake. The end result is improved phenological processes delivering optimum plant performance.

N5%, P8%, K3% with trace minerals, biology (including VAM), plant stimulants and organic acids. A combination designed to enhance nutrient uptake & early plant vigour. Compatible with UAN Nitrogen.

A rhizosphere stimulant concentrated seed coating for early root & plant vigour. Contains nutrient, root exudate enzymes, stimulants, carbohydrates, beneficial biology & organic acids. Increases early root & plant development via rhizosphere stimulation & associated fertiliser availability & root uptake.

A balanced liquid trace mineral package made bioavailable through a controlled fermentation process. The organic acids and chelated trace minerals, along with select plant stimulants, assist crops to reach their yield potential.

Custom blended liquid fertilisers to suit specific crop needs. High quality, low salt index ingredients are used and **Organic Acid Chelation** technology is utilised to ensure maximum plant uptake, disease suppression and plant performance.

Crop Stage	Seeding	Post Emergent	Pre Flowering	Crop Stress
PLANT GUARD	1L/HA	1L/HA	0.5L/HA	0.5L/HA
CROP STARTER	5-10L/HA	5-10L/HA		
ADVANCE PROMOTE	5-10L/HA			
ADVANCE AMINO			5-10L/HA	5-10L/HA
ADVANCE ZIMBA			2-4L/HA	
ADVANCE TRACE		2-4L/HA	2-4L/HA	2-4L/HA
ADVANCE ENERGIZE	8-10L/TONNE OF SEED			

PRODUCTS SUITABLE FOR EITHER FERTIGATION OR FOLIAR APPLICATION. REFER TO YOUR CONSULTANT FOR CROP SPECIFIC PROGRAMS.
