

NET WEIGHT: 1 pound / 454 grams.

FOR BEST RESULTS: Apply with white sugar & Switch Innovation's Advance Promote liquid soil stimulant.

TANK MIXING: Add products to the tank while filling & ensure constant agitation.

IMPORTANT MIXING ORDER: Water; Dormant Calcium; Sugar; Advance Promote.

APPLICATION RATE PER HA: (low & high rate)

- 0.5 – 1 BAG PER HA DORMANT CALCIUM
- 2 KGS PER HA WHITE SUGAR
- 10 - 20L PER HA ADVANCE PROMOTE

WATER RATE: Minimum 1,000L per HA. Use as high a rate as possible to maximise soil penetration.

Apply directly to root zone via irrigation.

TIMING: Apply in dormant periods (winter) so it can work on correcting imbalances in the soil.

For cropping apply at least 3 weeks before seeding.
