

# HORTICULTURE

**MICROSOIL**  
liquid fertiliser

**GREATER PLANT PRODUCTIVITY DURING  
ESTABLISHMENT, FLOWERING, FRUIT SET  
AND TIMES OF STRESS.**

**FERTILISER TECHNOLOGY DEVELOPED FOR AUSTRALIAN CONDITIONS**

 **OAC**  
Organic Acid Chelation

**WWW.SWITCHAG.AU**

**Switch Ag Products** have been scientifically proven in replicated trials to enhance plant performance and deliver higher yields.

Our products can be applied with fertiliser & pesticides by either fertigation or foliar application.

Product Certified for  
**ORGANIC FARMING**

A unique liquid combination of 14 strains of beneficial microbes, plant stimulants and carbohydrates has been independently proven in years of field trials to improve fertiliser availability & plant uptake, reduce fungal disease and increase yield.

Advance Amino is a full spectrum L-Amino acid that is derived from plants making it highly available to all agricultural crops. Its unique combination includes a range of beneficial biology, trace minerals, carbohydrates and enzymes.

The only form of Silicon that is available to plant roots is Monosilicic Acid (H4SiO4). Plant Guard has the highest tested level of Monosilicic Acid available for both root & foliar uptake by plants – 24% MSA. Creating strong, healthy, resilient plants.

Energize **Nutrient Release & Delivery Technology (NRDT)** is a unique combination of liquid nutrients, root exudate enzymes, amino acids, carbohydrates and bio-stimulants that release tied up nutrients and deliver those nutrients to plant roots.

ZIMBA combines a range of essential trace minerals complexed with organic acids, plant stimulants and beneficial biology to maximise plant uptake. The end result is improved phenological processes delivering optimum plant performance.

Custom blended liquid fertilisers to suit specific crop needs. High quality, low salt index ingredients are used and **Organic Acid Chelation** technology is utilised to ensure maximum plant uptake, disease suppression and plant performance.

A unique liquid formulation of 'Type 1' Copper supplemented with carbohydrates and natural antioxidants that improve its absorption & systemic activity in the plant. Further benefits include application via foliar or irrigation plus low risk of phytotoxicity allowing for year round application.

A fast-acting, highly refined available calcium that works at low rates to increase water penetration and to reduce both salinity & compaction in the soil. An easy to apply soluble solution that also increases calcium availability.

Crop Stage	Pre Bud Burst	Flowering Fruit Set	Fruit Enlargement	Crop Stress	Post Harvest	Dormancy
PLANT GUARD	1L/HA	1L/HA		1L/HA	1L/HA	1L/HA
ADVANCE PROMOTE	10L/HA		5-10L/HA		10L/HA	10L/HA
ADVANCE AMINO		10L/HA	5-10L/HA	5-10L/HA		
ADVANCE ZIMBA		2-4L/HA	2-4L/HA			
ADVANCE ENERGIZE		5-10L/HA	5-10L/HA			
VP COPPER		2-4L/HA	2-4L/HA			
DORMANT CALCIUM						1 BAG/HA

PRODUCTS SUITABLE FOR EITHER FERTIGATION OR FOLIAR APPLICATION. REFER TO YOUR CONSULTANT FOR CROP SPECIFIC PROGRAMS.
